

Zebra Platen Roller Information Sheet

For Mobile, Desktop, Commercial, Industrial, PAX, RFID & Performance Printers

The platen roller is used to allow easy transport of the labels, tags & fanfold media through the printer but at the same time also giving consistent tracking while the printer is feeding or printing

The platen roller is a consumable part but usually lasts approximately 2-3 years depending on the printer model, use and preventative maintenance.

To ensure your platen's life is kept to the maximum please clean this part using the recommended cleaning solution (see Cleaning Kit parts for details of Zebra approved parts) and at the recommended intervals as stated in the printers users guide.
